## Replacement Mirrors; **CROSS-VIEWS**

MIRROR LITE COMPANY makes cross view mirror systems that far exceed the competition. The charts below detail the Mirror Lite part number that can directly replace a given Rosco part. Although we sell many different types of cross view mirrors, we recommend the industry's first UNIVERSAL replacement crossview mirror; the High Definition™. It is available in 1" tunnel mount, Bus Boy™ mount, and ball stud mount. The advantages are it's far superior forward visibility, shatter-proof lense, and new injection molded plastic trim ring.

### ***Cross View Mirrors - Ball Stud Application***
